

Section A ERD

The database uses seven entities

1. Users
2. Organisers
3. ParticipantProfiles
4. Events
5. Categories
6. Enrolments
7. Results

Key Relationships & Cardinalities

Users -- ParticipantProfiles: 1-to-1 relationship (each user account corresponds to one participant profile).

Users -- Organisers: 1-to-Many (1 to 1..*)—one user can act as multiple organiser entities.

Organisers -- Events: 1-to-Many (1 to 1..*)—an organiser can create and host multiple events.

Events -- Categories: 1-to-Many (1 to 1..*)—each event contains one or more categories.

ParticipantProfiles -- Categories: Represented as a Many-to-Many (*..*) relationship that is resolved physically through the Enrolments junction table.

Enrolments -- Results: 1-to-Many (1 to 1..*)—an enrolment can have associated result records
